Save space on your desk with compact A4 scanners

EPSON®

Epson's first U-turn path scanner

The new compact desktop range of scanners offer an all-in-one scanning solution for anyone who has limited desk space and needs to scan various types of media and documents.

Built to balance the scale between power and convenience, these highly versatile scanners empower businesses of all sizes to do more with less and reap all the benefits of an ultra-compact scanner without having to sacrifice precious office deskspace.

ES-C320W

is ideal for customers who have limited workspace and require Wi-Fi connectivity i.e. pharmacies, remote workers, or accountants who need to scan invoices, receipts and quickly save into their accounting system.

ES-C380W

features ScanWay technology and is the perfect choice for customers on the go who require multiple scanning methods and want to quickly capture and save documents without being connected to a PC.

DS-C330

provides customers with a high performance, affordable scanner that can capture and digitise documents with minimal intervention to daily workflows – making it ideal for fast-moving businesses.

DS-C490

offers the perfect solution for customers who handle, capture, process, and store passports, identity cards and other types of documentation in front of house reception areas with limited space.

Choose your path

U-turn path

Epson is known for its ability to produce versatile, robust, and reliable devices – and our latest range of A4 compact desktop scanners are no exception.

Utilising our unique path position selector, these scanners can quickly switch between Straight path and U-turn path mid-operation to streamline productivity and scan a wider range of media without disruption.

Though compact in size, the scanner does not compromise on performance, and is loaded with features to help facilitate all your scanning needs.

Sliding the position selector button across adjusts the scanner's angle

Straight path

Paper is ejected from the front in straight path mode

Saving space, even while in use

Identity document MRZ scanning

Document Capture Pro

For travel agencies, hotels, car rental providers and any other type of organisation that needs to scan and store passport and travel document information on a regular basis, these scanners offer immense value.

Document Capture Pro captures and indexes all personal data from the Machine Readable Zone of passports (MRZ) and travel documents (TD1) in excel compatible formats.

The MRZ data is read and an index preview is created

The document is then exported as a .csv file

Software enhancements

With our newly enhanced Epson software, scanned images are clearer than ever before. It comes with a host of advanced enhancement features.

Document edge restoration

Document edges such as folds, tears, border shadows and punch holes in original documents can be easily scanned, corrected, and improved by utilising the surrounding document's colours.
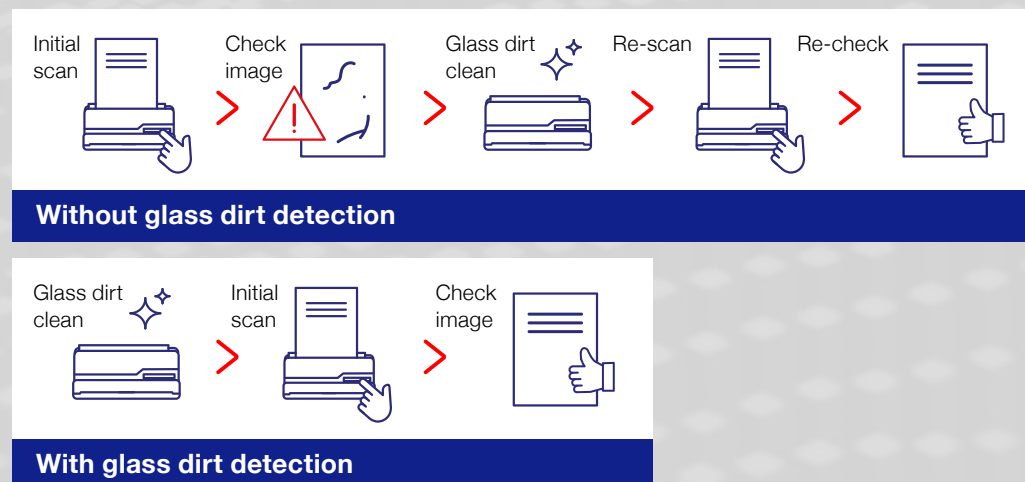

Folded edge	Paper tear	Border shadow	Punch hole
Edge correction			**Hole removal**

Punch hole
Paper tear
Folded edge
Border shadow

Paper protection technology

To prevent damage to important documents and improve the peace of mind of every user, the machine will automatically halt the scan if it detects an abnormal load on the rollers or if the image is skewed.

Dirt on glass detection

This latest range of scanners also feature advanced dirt detection technology taken from our established range of A4 sheet-fed scanners that alerts users when and where the scanner glass needs to be cleaned.

Initial scan > Check image > Glass dirt clean > Re-scan > Re-check

Without glass dirt detection

Glass dirt clean > Initial scan > Check image

With glass dirt detection

Epson ES-C380W joins the ScanWay family

Our ScanWay models provide a PC-less scanning solution that is simple, reliable and secure – with each of the models offering a display screen or shortcut buttons that allow users to customise jobs for enhanced operability.

Scan direct to network folders, email addresses, USB memory stick and popular cloud based services including Google Drive, Dropbox, Evernote, OneDrive for business using Epson Connect. Scan to Microsoft Teams channels can be performed using the Sharepoint online connector.

Other ScanWay models in our range

ES-580W

Easy to use wireless scanning solution

35 pages per minute/70ipm, Wi-Fi & Wi-Fi Direct, USB 3.0, 10.9cm colour touchscreen, scan to functionality, panel customisation, 100 Sheet ADF.

DS-730N

Affordable standalone scanning solution

40 pages per minute/80ipm, USB 2.0 and Ethernet, 3 quick send shortcut buttons, scan to functionality, 3.7cm colour LCD, 100 sheet ADF.

DS-790WN

Premier, standalone scanning solution

45 pages per minute/90ipm, Wi-Fi & Wi-Fi Direct, Ethernet, USB 3.0, 10.9cm colour touchscreen display, user authentication, scan to functionality, 100 sheet ADF.
